

# PM Slope Amp – CV level control

Edit 2022-03-09

This preset uses **Slope Amp** as “electronic potentiometer” like it is done with a remote control of a TV set.

## Slope Amp setups:

single cv mode	off
link mode	on
up slope	about 10
max %	100
min %	0

“On” signals at **up CV in** or **down CV in** will increase / decrease audio level.

An “on” at **mute CV in** turns audio off.
